# **HOME REPORT**

#### 11E FOREST PARK ROAD DUNDEE DD1 5NZ

# ENERGY PERFORMANCE CERTIFICATE

### **Energy Performance Certificate (EPC)**

**Dwellings** 

# **Scotland**

#### 11E FOREST PARK ROAD, DUNDEE, DD1 5NZ

Dwelling type: Mid-floor flat

Date of assessment: 01 November 2021

Date of certificate: 04 November 2021

**Total floor area:** 6 m<sup>2</sup>

Primary Energy Indicator: 2194 kWh/m²/year

**Reference number:** 9170-2749-2090-2109-6435 **Type of assessment:** RdSAP, existing dwelling

**Approved Organisation:** Elmhurst

Main heating and fuel: Boiler and radiators, mains

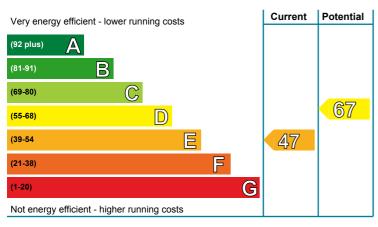

gas

#### You can use this document to:

- . Compare current ratings of properties to see which are more energy efficient and environmentally friendly
- Find out how to save energy and money and also reduce CO<sub>2</sub> emissions by improving your home

| Estimated energy costs for your home for 3 years* | £1,479 | See your recommendations       |
|---|--------|--------------------------------|
| Over 3 years you could save*                      | £600   | report for more<br>information |

<sup>\*</sup> based upon the cost of energy for heating, hot water, lighting and ventilation, calculated using standard assumptions

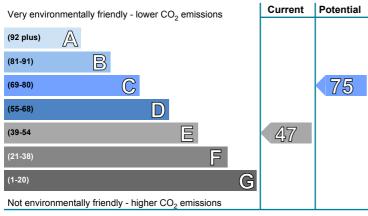

#### **Energy Efficiency Rating**

This graph shows the current efficiency of your home, taking into account both energy efficiency and fuel costs. The higher this rating, the lower your fuel bills are likely to be.

Your current rating is **band E (47)**. The average rating for EPCs in Scotland is **band D (61)**.

The potential rating shows the effect of undertaking all of the improvement measures listed within your recommendations report.

#### **Environmental Impact (CO<sub>2</sub>) Rating**

This graph shows the effect of your home on the environment in terms of carbon dioxide ( $CO_2$ ) emissions. The higher the rating, the less impact it has on the environment.

Your current rating is **band E (47)**. The average rating for EPCs in Scotland is **band D (59)**.

The potential rating shows the effect of undertaking all of the improvement measures listed within your recommendations report.

#### Top actions you can take to save money and make your home more efficient

| Recommended measures                                | Indicative cost  | Typical savings over 3 years |
|---|------------------|------------------------------|
| 1 Internal or external wall insulation              | £4,000 - £14,000 | £315.00                      |
| 2 Add additional 80 mm jacket to hot water cylinder | £15 - £30        | £42.00                       |
| 3 Heating controls (room thermostat)                | £350 - £450      | £75.00                       |

A full list of recommended improvement measures for your home, together with more information on potential cost and savings and advice to help you carry out improvements can be found in your recommendations report.

To find out more about the recommended measures and other actions you could take today to stop wasting energy and money, visit greenerscotland.org or contact Home Energy Scotland on 0808 808 2282.

THIS PAGE IS THE ENERGY PERFORMANCE CERTIFICATE WHICH MUST BE AFFIXED TO THE DWELLING AND NOT BE REMOVED UNLESS IT IS REPLACED WITH AN UPDATED CERTIFICATE

#### Summary of the energy performance related features of this home

This table sets out the results of the survey which lists the current energy-related features of this home. Each element is assessed by the national calculation methodology; 1 star = very poor (least efficient), 2 stars = poor, 3 stars = average, 4 stars = good and 5 stars = very good (most efficient). The assessment does not take into consideration the condition of an element and how well it is working. 'Assumed' means that the insulation could not be inspected and an assumption has been made in the methodology, based on age and type of construction.

| Element               | Description   | Energy Efficiency | Environmental |
|-----------------------|---|-------------------|---------------|
| Walls                 | Sandstone or limestone, as built, no insulation (assumed) | ***               | ***           |
|                       | Solid brick, as built, partial insulation (assumed)       | <b>★★★☆☆</b>      | ★★★☆☆         |
| Roof                  | (another dwelling above)                                  | _                 | _             |
| Floor                 | (another dwelling below)                                  | _                 | _             |
| Windows               | Fully double glazed                                       | <b>★★★</b> ☆      | <b>★★★</b> ☆  |
| Main heating          | Boiler and radiators, mains gas                           | <b>★★★</b> ☆      | <b>★★★</b> ☆  |
| Main heating controls | Programmer, TRVs and bypass                               | <b>★★★☆☆</b>      | ***           |
| Secondary heating     | Room heaters, mains gas                                   | _                 | _             |
| Hot water             | From main system  | ***               | ***           |
| Lighting              | Low energy lighting in 80% of fixed outlets               | ****              | ****          |

#### The energy efficiency rating of your home

Your Energy Efficiency Rating is calculated using the standard UK methodology, RdSAP. This calculates energy used for heating, hot water, lighting and ventilation and then applies fuel costs to that energy use to give an overall rating for your home. The rating is given on a scale of 1 to 100. Other than the cost of fuel for electrical appliances and for cooking, a building with a rating of 100 would cost almost nothing to run.

As we all use our homes in different ways, the energy rating is calculated using standard occupancy assumptions which may be different from the way you use it. The rating also uses national weather information to allow comparison between buildings in different parts of Scotland. However, to make information more relevant to your home, local weather data is used to calculate your energy use, CO<sub>2</sub> emissions, running costs and the savings possible from making improvements.

#### The impact of your home on the environment

One of the biggest contributors to global warming is carbon dioxide. The energy we use for heating, lighting and power in our homes produces over a quarter of the UK's carbon dioxide emissions. Different fuels produce different amounts of carbon dioxide for every kilowatt hour (kWh) of energy used. The Environmental Impact Rating of your home is calculated by applying these 'carbon factors' for the fuels you use to your overall energy use.

The calculated emissions for your home are 387 kg CO<sub>2</sub>/m<sup>2</sup>/yr.

The average Scottish household produces about 6 tonnes of carbon dioxide every year. Based on this assessment, heating and lighting this home currently produces approximately 2.2 tonnes of carbon dioxide every year. Adopting recommendations in this report can reduce emissions and protect the environment. If you were to install all of these recommendations this could reduce emissions by 1.2 tonnes per year. You could reduce emissions even more by switching to renewable energy sources.

#### Estimated energy costs for this home

|           | Current energy costs | Potential energy costs | Potential future savings |
|-----------|----------------------|------------------------|--------------------------|
| Heating   | £981 over 3 years    | £588 over 3 years      |                          |
| Hot water | £453 over 3 years    | £246 over 3 years      | You could                |
| Lighting  | £45 over 3 years     | £45 over 3 years       | save £600                |
| Totals    | £1,479               | £879                   | over 3 years             |

These figures show how much the average household would spend in this property for heating, lighting and hot water. This excludes energy use for running appliances such as TVs, computers and cookers, and the benefits of any electricity generated by this home (for example, from photovoltaic panels). The potential savings in energy costs show the effect of undertaking all of the recommended measures listed below.

#### **Recommendations for improvement**

The measures below will improve the energy and environmental performance of this dwelling. The performance ratings after improvements listed below are cumulative; that is, they assume the improvements have been installed in the order that they appear in the table. Further information about the recommended measures and other simple actions to take today to save money is available from the Home Energy Scotland hotline which can be contacted on 0808 808 2282. Before carrying out work, make sure that the appropriate permissions are obtained, where necessary. This may include permission from a landlord (if you are a tenant) or the need to get a Building Warrant for certain types of work.

| Bassaman dad massama |   | Indicative cost  | Typical saving | Rating after improvement |             |
|----------------------|---|------------------|----------------|--------------------------|-------------|
| Re                   | ecommended measures                               | Indicative cost  | per year       | Energy                   | Environment |
| 1                    | Internal or external wall insulation              | £4,000 - £14,000 | £105           | D 57                     | D 61        |
| 2                    | Add additional 80 mm jacket to hot water cylinder | £15 - £30        | £14            | D 59                     | D 63        |
| 3                    | Upgrade heating controls                          | £350 - £450      | £25            | D 61                     | D 66        |
| 4                    | Replace boiler with new condensing boiler         | £2,200 - £3,000  | £56            | D 67                     | C 75        |

#### **Alternative measures**

There are alternative improvement measures which you could also consider for your home. It would be advisable to seek further advice and illustration of the benefits and costs of such measures.

Micro CHP

#### Choosing the right improvement package

For free and impartial advice on choosing suitable measures for your property, contact the Home Energy Scotland hotline on 0808 808 2282 or go to www.greenerscotland.org.

#### About the recommended measures to improve your home's performance rating

This section offers additional information and advice on the recommended improvement measures for your home

#### 1 Internal or external wall insulation

Internal or external wall insulation involves adding a layer of insulation to either the inside or the outside surface of the external walls, which reduces heat loss and lowers fuel bills. As it is more expensive than cavity wall insulation it is only recommended for walls without a cavity, or where for technical reasons a cavity cannot be filled. Internal insulation, known as dry-lining, is where a layer of insulation is fixed to the inside surface of external walls; this type of insulation is best applied when rooms require redecorating. External solid wall insulation is the application of an insulant and a weather-protective finish to the outside of the wall. This may improve the look of the home, particularly where existing brickwork or rendering is poor, and will provide long-lasting weather protection. Further information can be obtained from the National Insulation Association (www.nationalinsulationassociation.org.uk). It should be noted that a building warrant is required for the installation of external wall insulation. Planning permission may also be required and that building regulations apply to external insulation so it is best to check with your local authority on both issues.

#### 2 Hot water cylinder insulation

Increasing the thickness of existing insulation by adding an 80 mm cylinder jacket around the hot water cylinder will help maintain the water at the required temperature; this will reduce the amount of energy used and lower fuel bills. The jacket should be fitted over the top of the existing foam insulation and over any thermostat clamped to the cylinder. Hot water pipes from the hot water cylinder should also be insulated, using pre-formed pipe insulation of up to 50 mm thickness, or to suit the space available, for as far as they can be accessed to reduce losses in summer. All these materials can be purchased from DIY stores and installed by a competent DIY enthusiast.

#### 3 Heating controls (room thermostat)

The heating system should have a room thermostat to enable the boiler to switch off when no heat is required. A competent heating engineer should be asked to do this work. Insist that the thermostat switches off the boiler as well as the pump and that the thermostatic radiator valve is removed from any radiator in the same room as the thermostat. Building regulations generally apply to this work and a building warrant may be required, so it is best to check with your local authority building standards department and seek advice from a qualified heating engineer.

#### 4 Condensing boiler

A condensing boiler is capable of much higher efficiencies than other types of boiler, meaning it will burn less fuel to heat this property. This improvement is most appropriate when the existing central heating boiler needs repair or replacement, however there may be exceptional circumstances making this impractical. Condensing boilers need a drain for the condensate which limits their location; remember this when considering remodelling the room containing the existing boiler even if the latter is to be retained for the time being (for example a kitchen makeover). Building regulations generally apply to this work and a building warrant may be required, so it is best to check with your local authority building standards department and seek advice from a qualified heating engineer.

#### Low and zero carbon energy sources

Low and zero carbon (LZC) energy sources are sources of energy that release either very little or no carbon dioxide into the atmosphere when they are used. Installing these sources may help reduce energy bills as well as cutting carbon.

**LZC energy sources present:** There are none provided for this home

#### Your home's heat demand

You could receive Renewable Heat Incentive (RHI) payments and help reduce carbon emissions by replacing your existing heating system with one that generates renewable heat and, where appropriate, having your loft insulated and cavity walls filled. The estimated energy required for space and water heating will form the basis of the payments. For more information go to www.energysavingtrust.org.uk/scotland/rhi.

| Heat demand                  | Existing dwelling | Impact of loft insulation | Impact of cavity wall insulation | Impact of solid wall insulation |
|------------------------------|-------------------|---------------------------|----------------------------------|---------------------------------|
| Space heating (kWh per year) | 3,327             | N/A                       | N/A                              | (1,784)                         |
| Water heating (kWh per year) | 2,231             |                           |                                  |                                 |

#### **Addendum**

This dwelling has stone walls and so requires further investigation to establish whether these walls are of cavity construction and to determine which type of wall insulation is best suited.

#### **About this document**

This Recommendations Report and the accompanying Energy Performance Certificate are valid for a maximum of ten years. These documents cease to be valid where superseded by a more recent assessment of the same building carried out by a member of an Approved Organisation.

The Energy Performance Certificate and this Recommendations Report for this building were produced following an energy assessment undertaken by an assessor accredited by Elmhurst (www.elmhurstenergy.co.uk), an Approved Organisation Appointed by Scottish Ministers. The certificate has been produced under the Energy Performance of Buildings (Scotland) Regulations 2008 from data lodged to the Scottish EPC register. You can verify the validity of this document by visiting www.scottishepcregister.org.uk and entering the report reference number (RRN) printed at the top of this page.

Assessor's name: Mr. Robert Fraser
Assessor membership number: EES/018605

Company name/trading name: D M Hall Chartered Surveyors LLP

Address: 17 Corstorphine Road

Edinburgh EH12 6DD

Phone number: 0131 477 6006

Email address: enquiries@dmhall.co.uk

Related party disclosure: No related party

If you have any concerns regarding the content of this report or the service provided by your assessor you should in the first instance raise these matters with your assessor and with the Approved Organisation to which they belong. All Approved Organisations are required to publish their complaints and disciplinary procedures and details can be found online at the web address given above.

#### Use of this energy performance information

Once lodged by your EPC assessor, this Energy Performance Certificate and Recommendations Report are available to view online at www.scottishepcregister.org.uk, with the facility to search for any single record by entering the property address. This gives everyone access to any current, valid EPC except where a property has a Green Deal Plan, in which case the report reference number (RRN) must first be provided. The energy performance data in these documents, together with other building information gathered during the assessment is held on the Scottish EPC Register and is available to authorised recipients, including organisations delivering energy efficiency and carbon reduction initiatives on behalf of the Scottish and UK governments. A range of data from all assessments undertaken in Scotland is also published periodically by the Scottish Government. Further information on these matters and on Energy Performance Certificates in general, can be found at www.gov.scot/epc.

#### Advice and support to improve this property

There is support available, which could help you carry out some of the improvements recommended for this property on page 3 and stop wasting energy and money. For more information, visit greeners cotland.org or contact Home Energy Scotland on 0808 808 2282.

Home Energy Scotland's independent and expert advisors can offer free and impartial advice on all aspects of energy efficiency, renewable energy and more.

| Date of inspection | 1st November 2021                   |

#### PART 1 - GENERAL

#### 1.1 THE SURVEYORS

The Seller has engaged the Surveyors to provide the Single Survey Report and a generic Mortgage Valuation Report for Lending Purposes. The Seller has also engaged the Surveyors to provide an Energy Report in the format prescribed by the accredited Energy Company.

The Surveyors are authorised to provide a transcript or retype of the generic Mortgage Valuation Report on to Lender specific pro-forma. Transcript reports are commonly requested by Brokers and Lenders. The transcript report will be in the format required by the Lender but will contain the same information, inspection date and valuation figure as the generic Mortgage Valuation Report and the Single Survey. The Surveyors will decline any transcript request which requires the provision of information additional to the information in the Report and the generic Mortgage Valuation Report until the Seller has conditionally accepted an offer to purchase made in writing.

Once the Seller has conditionally accepted an offer to purchase made in writing, the Purchaser's lender or conveyancer may request that the Surveyors provide general comment on standard appropriate supplementary documentation. In the event of a significant amount of documentation being provided to the Surveyors, an additional fee may be incurred by the Purchaser. Any additional fee will be agreed in writing.

If information is provided to the Surveyors during the conveyancing process which materially affects the valuation stated in the Report and generic Mortgage Valuation Report, the Surveyors reserve the right to reconsider the valuation. Where the Surveyors require to amend the valuation in consequence of such information, they will issue an amended Report and generic Mortgage Valuation Report to the Seller. It is the responsibility of the Seller to ensure that the amended Report and generic Mortgage Valuation Report are transmitted to every prospective Purchaser.

The individual Surveyor will be a member of the Royal Institution of Chartered Surveyors who is competent to survey, value and report upon Residential Property<sup>1</sup>.

If the Surveyors have had a previous business relationship within the past two years with the Seller or Sellers Agent or relative to the property, they will be obliged to indicate this by ticking the adjacent box.

The Surveyors have a written complaints handling procedure. This is available from the offices of the Surveyors at the address stated.

#### 1.2 THE REPORT

The Surveyors will not provide an amended Report on the Property, except to correct factual inaccuracies.

The Report will identify the nature and source of information relied upon in its preparation.

The Surveyor shall provide a Market Value of the Property, unless the condition of the Property is such that it would be inappropriate to do so. A final decision on whether a loan will be granted rests with the Lender who may impose retentions in line with their lending criteria. The date of condition and value of the property will be the date of inspection.

To date, Purchasers have normally obtained their own report from their chosen Surveyor. By contrast, a Single Survey is instructed by the Seller and made available to all potential Purchasers in the expectation that the successful Purchaser will have relied upon it. The Royal Institution of Chartered Surveyors rules require disclosure of any potential conflict of interest when acting for the Seller and the Purchaser in the same transaction. The Single Survey may give rise to a conflict of interest and if this is of concern to any party they are advised to seek their own independent advice.

<sup>&</sup>lt;sup>1</sup> Which shall be in accordance with the current RICS Valuation Standards (The Red Book) and RICS Rules of Conduct.

The Report and any expressions or assessments in it are not intended as advice to the Seller or Purchaser or any other person in relation to an asking price or any other sales or marketing decisions. The Report is based solely on the Property and is not to be relied upon in any manner whatsoever when considering the valuation or condition of any other property.

If certain minor matters are mentioned in the Report it should not be assumed that the Property is free of other minor defects.

Neither the whole nor any part of the Report may be published in any way, reproduced or distributed by any party other than the Seller, prospective purchasers and the Purchaser and their respective professional advisers without the prior written consent of the Surveyors.

#### 1.3 LIABILITY

The Report is prepared with the skill and care reasonably to be expected of a competent residential surveyor who is a member of the Royal Institution of Chartered Surveyors.

The Report is addressed to the Seller and was prepared in the expectation that it (or a complete copy) along with these Terms and Conditions (or a complete copy) would (or, as the case might be, would have been) be disclosed and delivered to:-

- the Seller;
- any person(s) noting an interest in purchasing the Property from the Seller;
- any person(s) who make(s) (or on whose behalf is made) an offer to purchase the Property, whether or not that offer is accepted by the Seller;
- the Purchaser; and
- the professional advisers of any of these.

The Surveyors acknowledge that their duty of skill and care in relation to the Report is owed to the Seller and to the Purchaser. The Surveyors accept no responsibility or liability whatsoever in relation to the Report to persons other than the Seller and the Purchaser. The Seller and Purchaser should be aware that if a Lender seeks to rely on this Report they do so at their own risk. In particular, the Surveyors accept no responsibility or liability whatsoever to any Lender in relation to the Report. Any such Lender relies upon the Report entirely at their own risk.

#### 1.4 GENERIC MORTGAGE VALUATION REPORT

The Surveyors undertake to the Seller that they will prepare a generic Mortgage Valuation Report, which will be issued along with the Single Survey. It is the responsibility of the Seller to ensure that the generic Mortgage Valuation Report is provided to every potential Purchaser.

#### 1.5 TRANSCRIPT MORTGAGE VALUATION FOR LENDING PURPOSES

The Surveyors undertake that on being asked to do so by a prospective purchaser, or his/her professional advisor or Lender, they will prepare a Transcript Mortgage Valuation Report for Lending Purposes on terms and conditions to be agreed between the Surveyors and Lender and solely for the use of the Lender and upon which the Lender may rely. The decision as to whether finance will be provided is entirely a matter for the Lender. The Transcript Mortgage Valuation Report <sup>2</sup> will be from information contained in the Report and the generic Mortgage Valuation Report.

<sup>&</sup>lt;sup>2</sup> Which shall be in accordance with the current RICS Valuation Standards (The Red Book) and RICS Rules of Conduct

#### 1.6 INTELLECTUAL PROPERTY

All intellectual property rights whatsoever (including copyright) in and to the Report, excluding the headings and rubrics, are the exclusive property of the Surveyors and shall remain their exclusive property unless they assign the same to any other party in writing.

#### 1.7 PAYMENT

The Surveyors are entitled to refrain from delivering the Report to anyone until the fee and other charges for it notified to the Seller have been paid. Additional fees will be charged for subsequent inspections and Reports.

#### 1.8 CANCELLATION

The Seller will be entitled to cancel the inspection by notifying the Surveyor's office at any time before the day of the inspection.

The Surveyor will be entitled not to proceed with the inspection (and will so report promptly to the Seller) if after arriving at the property, the Surveyor concludes that it is of a type of construction of which the surveyor has insufficient specialist knowledge to be able to provide the inspection satisfactorily. The Surveyor will also be entitled not to proceed if after arriving at the property, the surveyor concludes that the property is exempt under Part 3 of The Housing (Scotland) Act 2006 as detailed in the (Prescribed Documents) Regulations 2008. If there is a potential threat to their health or personal safety, the inspection may be postponed or cancelled, at the Surveyor's discretion.

In the case of cancellation or the inspection not proceeding, the Surveyor will refund any fees paid by the Seller for the inspection and Report, except for expenses reasonably incurred and any fee due in light of the final paragraph of this section.

In the case of cancellation by the Seller, for whatever reason, after the inspection has taken place but before a written report is issued, the Surveyor will be entitled to raise an Invoice equivalent to 80% of the agreed fee.

#### 1.9 PRECEDENCE

If there is any incompatibility between these Terms and Conditions and the Report, these Terms and Conditions take precedence.

#### 1.10 DEFINITIONS

- the "Lender" is the party who has provided or intends or proposes to provide financial assistance to the Purchaser towards the purchase of the Property and in whose favour a standard security will be granted over the Property;
- the "Transcript Mortgage Valuation Report for Lending Purposes" means a separate report, prepared by the Surveyor, prepared from information in the Report and the generic Mortgage Valuation Report, but in a style and format required by the Lender. The Transcript Mortgage Valuation Report for Lending Purposes will be prepared with the skill and care reasonably to be expected from a surveyor who is a member of the Royal Institution of Chartered Surveyors and who is competent to survey, value and report on the Property;
- the "Generic Mortgage Valuation Report" means a separate report, prepared by the Surveyor from information in the Report but in the Surveyor's own format;

- the "Market Value" is the estimated amount for which a property should exchange on the date of valuation between a willing buyer and a willing seller in an arm's-length transaction after proper marketing wherein the parties had each acted knowledgeably, prudently and without compulsion;
- the "Property" is the property which forms the subject of the Report;
- the "Purchaser" is the person (or persons) who enters into a contract to buy the Property from the Seller:
- a "prospective Purchaser" is anyone considering buying the Property;
- the "Report" is the report, of the kind described in Part 2 of these Terms and Conditions and in the form set out in part 1 of Schedule 1 of the Housing (Scotland) Act 2006 (Prescribed Documents) Regulations 2008;
- the "Seller" is/are the proprietor(s) of the Property;
- the "Surveyor" is the author of the Report on the Property; and
- the "Surveyors" are the firm or company of which the Surveyor is an employee, director, member or partner (unless the Surveyor is not an employee, director, member or partner, when the "Surveyors" means the Surveyor) whose details are set out at the head of the Report.
- the "Energy Report" is the advice given by the accredited Energy Company, based on information collected by the Surveyor during the Inspection, and also includes an Energy Performance Certificate, in a Government approved format.

#### PART 2 - DESCRIPTION OF THE REPORT

#### 2.1 THE SERVICE

The Single Survey is a Report by an independent Surveyor, prepared in an objective way regarding the condition and value of the Property on the day of the inspection, and who is a member of the Royal Institution of Chartered Surveyors. It includes an Energy Report as required by Statute and this is in the format of the accredited Energy Company. In addition, the Surveyor has agreed to supply a generic Mortgage Valuation Report.

#### 2.2 THE INSPECTION

The Inspection is a general surface examination of those parts of the Property which are accessible: in other words, visible and readily available for examination from ground and floor levels, without risk of causing damage to the Property or injury to the Surveyor.

All references to visual inspection refer to an inspection from within the property at floor level and from ground level within the site and adjoining public areas, without the need to move any obstructions. Any references to left or right are taken facing the front of the property.

The Inspection is carried out with the Seller's permission, without causing damage to the building or contents. Furniture, stored items and insulation are not moved.

Unless identified in the report the Surveyor will assume that no harmful or hazardous materials have been used in the construction. The presence or possible consequences of any site contamination will not be researched.

The Surveyor will not carry out an asbestos inspection, and will not be acting as an asbestos inspector in completing a Single Survey of properties that may fall within the Control of Asbestos in the Workplace Regulations. In the case of flats it will be assumed that there is a duty holder, as defined in the Regulations and that a Register of Asbestos and effective Management Plan is in place, which does not require any expenditure, or pose a significant risk to health. No enquiry of the duty holder will be made.

#### 2.3 THE REPORT

The Report will be prepared by the Surveyor who carried out the property inspection and will describe various aspects of the property as defined by the headings of the Single Survey report with the comments being general and unbiased. The report on the location, style and condition of the property, will be concise and will be restricted to matters that could have a material effect upon value and will omit items that, in the Surveyor's opinion, are not significant. If certain minor matters are mentioned, it should not be interpreted that the property is free of any other minor defects.

Throughout the report, the following repair categories will be used to give an overall opinion of the state of repair and condition of the property.

- Category 3: Urgent repairs or replacement are needed now. Failure to deal with them may cause problems to other parts of the property or cause a safety hazard. Estimates for repairs or replacement are needed now.
- 2. Category 2: Repairs or replacement requiring future attention, but estimates are still advised.
- 3. Category 1: No immediate action or repair is needed.

#### **WARNING:**

If left unattended, even for a relatively short period, Category 2 repairs can rapidly develop into more serious Category 3 repairs. The existence of Category 2 or Category 3 repairs may have an adverse effect on marketability, value and the sale price ultimately achieved for the property. This is particularly true during slow market conditions when the effect can be considerable.

Parts of the property, which cannot be seen or accessed, will not be reported upon and this will be stated. If the Surveyor suspects that a defect may exist within an unexposed area and which could have a material effect upon the value, he may recommend further investigation by specialist contractors.

#### 2.4 SERVICES

Surveyors are not equipped or qualified to test the services and therefore no comment can be interpreted as implying that the design, installation and function of the services are in accordance/compliance with regulations, safety and efficiency expectations. However, comment is made where there is cause to suspect significant defects or shortcomings with the installations. No tests are made of any services or appliances.

#### 2.5 ACCESSIBILITY

A section is included to help identify the basic information interested parties need to know to decide whether to view a property.

#### 2.6 ENERGY REPORT

A section is included that makes provision for an Energy Report, relative to the property. The Surveyor will collect physical data from the property and provide such data in a format required by an accredited Energy Company. The Surveyor cannot of course accept liability for any advice given by the Energy Company.

#### 2.7 VALUATION AND CONVEYANCER ISSUES

The last section of the Report contains matters considered relevant to the Conveyancer (Solicitor). It also contains the Surveyor's opinion both of the market value of the property and of the re-instatement cost, as defined below.

"Market Value" is the estimated amount for which a property should exchange on the date of valuation between a willing buyer and a willing seller in an arm's-length transaction after proper marketing wherein the parties had each acted knowledgeably, prudently and without compulsion. In arriving at the opinion of the Market Value, the Surveyor also makes various standard assumptions covering, for example, vacant possession; tenure and other legal considerations; contamination and hazardous materials; the condition of un-inspected parts; the right to use mains services; and the exclusion of curtains, carpets etc. from the valuation. In the case of flats, the following further assumptions are made that:

- There are rights of access and exit over all communal roadways, corridors, stairways etc. and to use communal grounds, parking areas, and other facilities;
- There are no particularly troublesome or unusual legal restrictions;
- There is no current dispute between the occupiers of the flats or any outstanding claims or losses; and the costs of repairs to the building are shared among the co-proprietors on an equitable basis.

Any additional assumption, or any found not to apply, is reported.

"Re-instatement cost" is an estimate for insurance purposes of the current cost of rebuilding the Property in its present form unless otherwise stated. This includes the cost of rebuilding the garage and permanent outbuildings, site clearance and professional fees, but excludes VAT (except on the fees).

Sellers or prospective Purchasers may consider it prudent to instruct a reinspection and revaluation after a period of 12 weeks (or sooner if appropriate) to reflect changing circumstances in the market and/or in the physical condition of the Property.

#### 1. Information and scope of inspection

This section tells you about the type, accommodation, neighbourhood, age and construction of the property. It also tells you about the extent of the inspection and highlights anything that the surveyor could not inspect.

All references to visual inspection refer to an inspection from within the property without moving any obstructions and externally from ground level within the site and adjoining public areas. Any references to left or right in a description of the exterior of the property refer to the view of someone standing facing that part of the property from the outside.

The inspection is carried out without causing damage to the building or its contents and without endangering the occupiers or the surveyor. Heavy furniture, stored items and insulation are not moved. Unless identified in the report the surveyor will assume that no harmful or hazardous materials or techniques have been used in the construction. The presence or possible consequences of any site contamination will not be researched.

Services such as TV/cable connection, internet connection, swimming pools and other leisure facilities etc. will not be inspected or reported on.

| Description                    | The property comprises a purpose built second floor flat in a four storey tenement comprising eight flats in total. All eight flats shared a communal stairwell. |
|--------------------------------|--|
| Γ                              |  |
| Accommodation                  | The accommodation within comprises:  |
|                                | ON SECOND ELOOP: Entranag Hall Laurga Badraam Kitahan  |
|                                | ON SECOND FLOOR: Entrance Hall, Lounge, Bedroom, Kitchen and Bathroom with WC and Separate Shower.   |
|                                | and Dannesminimities and Soparate Chenen   |
|                                |  |
| Gross internal floor area (m²) | 56 square metres or thereby.   |
|                                |  |
| Neighbourhood and location     | The property is located within an established area near the centre of Dundee where surrounding properties are of a similar class and                             |
|                                | nature. There are good amenities available nearby and the property is suitable to the district.  |
|                                |  |
| Age                            | Circa 1890.  |
|                                |  |
| Weather                        | Clear and dry  |
| vveatilei                      | Clear and dry.   |
|                                |  |
| Chimney stacks                 | Visually inspected with the aid of binoculars where appropriate.   |
|                                | The chimneys serving the tenement are of stone construction with cement pointing.  |
|                                |  |
| Roofing including roof space   | Sloping roofs were visually inspected with the aid of binoculars where appropriate.  |
|                                | The roof is pitched and slated. Only a limited inspection of the roof covering was possible from ground level.   |
|                                | At the time of inspection no access was available to the communal roof void. The access hatch was secured.   |

| Rainwater fittings                  | Visually inspected with the aid of binoculars where appropriate.  |
|-------------------------------------|---|
|                                     | The rainwater pipes are in PVC and metal construction.  |
|                                     |   |
| Main walls                          | Visually inspected with the aid of binoculars where appropriate.  |
|                                     | Foundations and concealed parts were not exposed or inspected.  |
|                                     | The main walls are of stone construction externally pointed and internally lined.   |
| <b></b>                             |   |
| Windows, external doors and joinery | Internal and external doors were opened and closed where keys were available.   |
|                                     | Random windows were opened and closed where possible.   |
|                                     | Doors and windows were not forced open.   |
|                                     | The windows are in PVC with double glazed panels. The entrance door to the subject flat is of timber construction.  |
|                                     |   |
| External decorations                | Visually inspected.   |
|                                     | The external timbers are painted.   |
| Conservatories / porches            | None.   |
|                                     |   |
| Communal areas                      | Circulation areas visually inspected.   |
|                                     | There is a communal stairwell serving all eight flats. The stairs are of stone construction and the stairwell is fitted with stair lighting and an intercom system. |
|                                     |   |
| Garages and permanent outbuildings  | There is no space on site for the erection of a garage and no off street parking available. There are no significant outbuildings on site.                          |
|                                     |   |
| Outside areas and boundaries        | Visually inspected.   |
|                                     | The property occupies a site with a small area of forecourt and an enclosed area of garden to the rear. The front forecourt areas are                               |

| Г                                     |  |
|---------------------------------------|--|
| Ceilings                              | Visually inspected from floor level.   |
|                                       | The ceilings are a mixture of original timber lath and plaster and plasterboard.   |
| Internal walls                        | Visually inspected from floor level.   |
|                                       | Using a moisture meter, walls were randomly tested for dampness where considered appropriate.  |
|                                       | The internal walls are partly dry lined and partly plastered on hard.  |
| Floors including sub floors           | Surfaces of exposed floors were visually inspected. No carpets or floor coverings were lifted.   |
|                                       | Physical access to the sub floor area may be taken if the Surveyor deems it is safe and reasonable to do so, and subject to a minimum clearance of 1m between the underside of floor joists and the solum as determined from the access hatch.   |
|                                       | Floors are of timber construction. At the time of inspection the property was vacant and the floors partly covered.  |
| Internal joinery and kitchen fittings | Kitchen units were visually inspected excluding appliances.  |
|                                       | The kitchen is of a reasonable size for a property of this type and is fitted with ample storage units.  |
|                                       | The internal doors are of timber construction. There is storage accommodation within the hallway and lounge.   |
| Chimney breasts and fireplaces        | Visually inspected.  |
|                                       | No testing of the flues or fittings was carried out.   |
|                                       | There is a gas fire located within the lounge that is vented through the chimney head. The back boiler for the central heating is to the rear of the fire.   |
|                                       |  |
| Internal decorations                  | Visually inspected.  |
|                                       | The walls, ceilings etc are papered and painted.   |
| Cellars                               | None.  |
| Electricity                           | Accessible parts of the wiring were visually inspected without removing fittings. No tests whatsoever were carried out to the system or appliances. Visual inspection does not assess any services to make sure they work properly and efficiently and meet modern standards. If any services are turned off, the surveyor will state that in the report and will not turn them on.  There is a mains supply of electricity to the property and the electric |
|                                       |  |

| Gas                                 | Accessible parts of the system were visually inspected without removing fittings. No tests whatsoever were carried out to the system or appliances. Visual inspection does not assess any services to make sure they work properly and efficiently and meet modern standards. If any services are turned off, the surveyor will state that in the report and will not turn them on.  There is a mains supply of gas to the property and the gas meter is located within the kitchen. |
|-------------------------------------|--|
| Water, plumbing, bathroom fittings  | Visual inspection of the accessible pipework, water tanks, cylinders and fittings without removing any insulation.   |
|                                     | No tests whatsoever were carried out to the system or appliances.  |
|                                     | There is a mains supply of water to the property and the mains stopcock is located within the hall cupboard. The installation where visible is in copper and PVC piping.   |
|                                     | The sanitary arrangements comprise a bathroom with wc and separate shower.   |
| Heating and hot water               | Accessible parts of the system were visually inspected apart from communal systems, which were not inspected.  |
|                                     | No tests whatsoever were carried out to the system or appliances.  |
|                                     | There is a gas fired central heating system installed with radiators throughout. The central heating boiler is to the rear of the lounge fire and vented through the chimney area.   |
|                                     | Hot water is provided from the central heating system and an immersion heater.   |
| Drainage                            | Drainage covers etc. were not lifted.  |
| Dramage                             | Neither drains nor drainage systems were tested.   |
|                                     | Drainage is connected to the mains sewer.  |
| Fire, smoke and burglar alarms      | Visually inspected.  |
|                                     | No tests whatsoever were carried out to the system or appliances.  |
|                                     | Smoke detectors have been installed but not tested.  |
| Any additional limits to inspection | For flats / maisonettes  |
|                                     | Only the subject flat and internal communal areas giving access to the flat were inspected.  |
|                                     | If the roof space or under-building / basement is communal, reasonable and safe access is not always possible. If no inspection was possible, this will be stated. If no inspection  |

was possible, the surveyor will assume that there are no defects that will have a material effect on the valuation.

The building containing the flat, including any external communal areas, was visually inspected only to the extent that the surveyor is able to give an opinion on the general condition and standard of maintenance.

At the time of inspection the property was vacant but the floors were partly covered.

In accordance with Health and Safety guidelines I have not disturbed insulation, furniture or personal effects (particularly in cupboards). Floor coverings have not been moved.

The external inspection was carried out from ground level within the boundaries of the property and from adjoining highways. The inspection was limited to the subject flat and accessible common areas only.

Areas of the property that were covered, unexposed or inaccessible have not been inspected. It cannot be confirmed that such areas are free from infestation, decay or other defects.

It should be appreciated that further defects can arise after the date of inspection.

I have not carried out an inspection for Japanese Knotweed and unless otherwise stated, for the purposes of the valuation I have assumed that there is no Japanese Knotweed or other invasive plants within the boundaries of the property or in neighbouring properties.

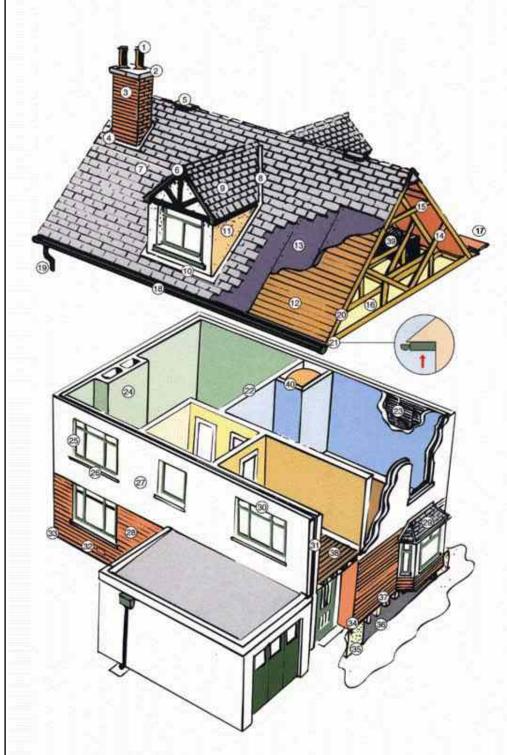

The report does not include an asbestos inspection. However asbestos was widely used in the building industry until around 2000, when it became a banned substance. If the possibility of asbestos based products has been reported within the limitations of the inspection and you have concerns you should engage a qualified asbestos surveyor.

Concealed areas beneath and around bath/shower trays were not visible. Water spillage in these areas can often be discovered unexpectedly with resultant damage to concealed parts of the fabric.

The inspection is not a fire or life safety risk assessment and should not be relied on as a risk assessment inspection. Further advice should be sought if a specific risk assessment of the property and building that it forms part of is required.

Where repairs are required at height compliance with Health and Safety legislation often requires the use of scaffolding which can significantly impact on the cost of repair. Pricing repairs is out with the remit of this report but it would be prudent to consider costs and budgeting before offering. The various trades can advise further.

#### Sectional Diagram showing elements of a typical house

Reference may be made in this report to some or all of the above component parts of the property. This diagram may assist you in locating and understanding these items.

- 1) Chimney pots
- (2) Coping stone
- 3) Chimney head
- 4) Flashing
- (5) Ridge ventilation
- 6) Ridge board
- 7) Slates / tiles
- (8) Valley guttering
- 9) Dormer projection
- 10 Dormer flashing
- 1) Dormer cheeks
- 12) Sarking
- (13) Roof felt

- 36) Solum
- 37) Floor joists
- 38) Floorboards
- 9) Water tank
- 40) Hot water tank

#### 2. Condition

This section identifies problems and tells you about the urgency of any repairs by using one of the following three categories:

| Category 3 | Category 2  | Category 1 |
|------------|---|------------|
|            | Repairs or replacement requiring future attention, but estimates are still advised. |            |

| Structural movement |  |
|---------------------|--|
| Repair category     | 1  |
| Notes               | There is evidence of settlement to the property but this appears to be of a longstanding and non progressive nature and is typical of properties within this locality. Accordingly this should not have an adverse affect on the future saleability. |

| Dampness, rot and infestation |  |
|-------------------------------|--|
| Repair category               | 1  |
| Notes                         | No infestation or decay was apparent to the exposed timbers.   |
|                               | Random damp readings were taken throughout the property and no significant levels of dampness were detected. |
|                               | It is not possible to comment on the condition of concealed areas.   |

| Chimney stacks  |  |
|-----------------|--|
| Repair category | 1  |
| Notes           | From ground level the chimney areas appear to be in satisfactory condition subject to normal weathering. |

| Roofing including roof space |  |
|------------------------------|--|
| Repair category              | 1  |
| Notes                        | No close inspection of the roof covering was possible but it is understood that regular maintenance has been undertaken. |

| Rainwater fittings |   |
|--------------------|---|
| Repair category    | 1   |
| Notes              | The alignment of the rear guttering appears to be off. It was not raining sufficiently at the time of inspection to indicate leakage. |

| Main walls      |  |
|-----------------|--|
| Repair category | 1                                      |
| Notes           | The wall surfaces appear satisfactory. |

| Windows, external doors and joinery |   |
|-------------------------------------|---|
| Repair category                     | 1   |
| Notes                               | Where tested the windows and doors function satisfactorily. |

| External decorations |   |
|----------------------|---|
| Repair category      | 1   |
| Notes                | The external decoration is to a reasonable standard allowing for normal weathering. |

| Conservatories/porches |                 |
|------------------------|-----------------|
| Repair category        | -               |
| Notes                  | Not applicable. |

| Communal areas  |   |
|-----------------|---|
| Repair category | 1   |
| Notes           | The communal stairwell is subject to typical wear and tear. |

| Garages and permanent outbuildings |                 |
|------------------------------------|-----------------|
| Repair category                    | -               |
| Notes                              | Not applicable. |

| Outside areas and boundaries |  |
|------------------------------|--|
| Repair category              | 1  |
| Notes                        | The rear garden is unkept and in need of attention. The ownership and liability for maintenance to the grounds and boundaries should be confirmed. |

| Ceilings        |   |
|-----------------|---|
| Repair category | 2   |
| Notes           | There is evidence of staining and unevenness to the ceilings in various rooms. It is understood that previous leakage from the upper flat has been rectified. |

| Internal walls  |   |
|-----------------|---|
| Repair category | 2   |
| Notes           | Staining was evident to the walls due to leakage from above and internally cracking was also evident to partitions that requires attention. |

| Floors including sub-floors |  |
|-----------------------------|--|
| Repair category             | 1  |
| Notes                       | Internal sloping was noted to the flooring. This appears to be of a longstanding nature. |

| Internal joinery and kitchen fittings |  |
|---------------------------------------|--|
| Repair category                       | 1  |
| Notes                                 | The kitchen fittings are subject to wear and tear and the area would benefit from upgrading.  The internal doors, skirtings etc are in reasonable condition subject to normal wear and tear. Sloping was evident to the door frames. |

| Chimney breasts and fireplaces |  |
|--------------------------------|--|
| Repair category                | 1  |
| Notes                          | The gas fire serving the central heating boiler is dated. It is understood the system is serviced. |

| Internal decorations |  |
|----------------------|--|
| Repair category      | 1  |
| Notes                | The property would benefit from redecoration throughout. |

| Cellars         |                 |
|-----------------|-----------------|
| Repair category | -               |
| Notes           | Not applicable. |

| Electricity     |  |
|-----------------|--|
| Repair category | 2  |
| Notes           | It is recommended that all electrical installations be checked every five years or on change of ownership to keep up to date with frequent changes in Safety Regulations. Further advice will be available from a qualified NICEIC registered Contractor. It should be appreciated that only recently constructed or rewired properties will have installations which fully comply with IEE regulations. |

| Gas             |  |
|-----------------|--|
| Repair category | 1  |
| Notes           | Trade bodies governing gas installations currently advise that gas appliances should be tested prior to change in occupancy and thereafter at least once a year by a Gas Safe registered contractor. It is assumed that gas appliances comply with relevant regulations. |

| Water, plumbing and bathroom fittings |   |  |
|---------------------------------------|---|--|
| Repair category                       | 1   |  |
| Notes                                 | The sanitary fittings are subject to typical wear and tear. The shower area is subject to condensation.  It is important to maintain a watertight seal around the various fittings and appliances to prevent water spillage to damage to surrounding surfaces and concealed areas. It is not possible to comment on the condition of concealed areas. |  |

| Heating and hot water |  |  |  |
|-----------------------|--|--|--|
| Repair category       | 2  |  |  |
| Notes                 | The central heating boiler is dated and the system would benefit from upgrading. It is understood the present system is serviced on a regular basis. |  |  |

| Drainage        |  |
|-----------------|--|
| Repair category | 1  |
| Notes           | The above ground drainage appeared satisfactory. |

Set out below is a summary of the condition of the property which is provided for reference only. You should refer to the previous comments for detailed information.

#### **Category 3**

Urgent repairs or replacement are needed now. Failure to deal with them may cause problems to other parts of the property or cause a safety hazard. Estimates for repairs or replacement are needed now.

#### Category 2

Repairs or replacement requiring future attention, but estimates are still advised.

#### Category 1

No immediate action or repair is needed.

#### Remember

The cost of repairs may influence the amount someone is prepared to pay for the property. We recommend that relevant estimates and reports are obtained in your own name.

#### Warning

If left unattended, even for a relatively short period, Category 2 repairs can rapidly develop into more serious Category 3 repairs. The existence of Category 2 or Category 3 repairs may have an adverse effect on marketability, value and the sale price ultimately achieved for the property. This is particularly true during slow market conditions where the effect can be considerable.

#### 3. Accessibility information

#### Guidance notes on accessibility information

Three steps or fewer to a main entrance door of the property:

In flatted developments the 'main entrance' would be the flat's own entrance door, not the external door to the communal stair. The 'three steps or fewer' are counted from external ground level to the flat's entrance door. Where a lift is present, the count is based on the number of steps climbed when using the lift.

#### Unrestricted parking within 25 metres:

For this purpose, 'Unrestricted parking' includes parking available by means of a parking permit. Restricted parking includes parking that is subject to parking restrictions, as indicated by the presence of solid yellow, red or white lines at the edge of the road or by a parking control sign, parking meters or other coin-operated machines.

| 8. Is there unrestricted parking within 25 metres of an entrance door to the building? | Yes X No |  |

#### 4. Valuation and conveyancer issues

This section highlights information that should be checked with a solicitor or licensed conveyancer. It also gives an opinion of market value and an estimated reinstatement cost for insurance purposes.

#### Matters for a solicitor or licensed conveyancer

The tenure is understood to be outright ownership.

The property form part of a tenement/block of flats and it has been assumed that maintenance/repair costs of the common parts of the building will be shared on an equitable basis with adjoining proprietors. It is therefore assumed that the cost of repairs detailed within the report will be apportioned accordingly although exact liability should be confirmed.

Internal alterations have been carried out in the past to arrive at the present layout. It is understood these works were carried out circa 1986. No further documentation is therefore required.

#### Estimated reinstatement cost for insurance purposes

For Reinstatement Cost Assessment purposes it is recommended that the subjects be insured for a sum of not less than £228,000 (Two Hundred and Twenty-Eight Thousand Pounds Sterling).

It should be noted this sum is an estimate calculated by using a rate per square metre based on information provided by Building Cost Information Service (BCIS).

#### Valuation and market comments

In its present condition the opinion of valuation for the Outright Ownership interest with vacant possession on 01 November 2021 is £70,000 (Seventy Thousand Pounds Sterling).

The property is located within an area where there is a reasonably good demand for properties of this type and we see no reason why this demand should not continue within in the foreseeable future.

# Mortgage Valuation Report

| General Remarks  |
|--|
| The property comprises a purpose built second floor tenement flat in a four storey block located near the centre of Dundee where surrounding properties are of a similar class and nature. There are good amenities available nearby.                |
| At the time of inspection the property was found to be in need of some general maintenance and upgrading. A number of defects were noted that were considered to be consistent with type and age.  |
| There is evidence of settlement to the property but this appears to be of a longstanding and non progressive nature and is typical of properties within this locality. Accordingly this should not have an adverse affect on the future saleability. |
| Internal alterations have been carried out in the past to arrive at the present layout. It is understood these works were carried out circa 1986. No further documentation is therefore required.  |

|    | How long have you owned the property? 26 years  |
| 2. | Council tax   |
|    | Which Council Tax band is your property in? (Please circle)   |
|    | (A) B C D E F G H   |
| 3. | Parking   |
|    | What are the arrangements for parking at your property?   |
|    | (Please tick all that apply)  |
|    | • Garage  |
|    | Allocated parking space   |
|    | Driveway  |
|    | Shared parking  |
|    | On street   |
|    | Resident permit   |
|    | Metered parking   |
|    | Other (please specify):   |
| 4. | Conservation area   |
|    | Is your property in a designated Conservation Area (i.e. an area of special architectural or historical interest, the character or appearance of which it is desirable to preserve or enhance)?  Yes / No / Den't know desirable to preserve or enhance)? |

| 5. | Listed buildings   |                                |
|----|--|--------------------------------|
|    | Is your property a Listed Building, or contained within one (i.e. a building recognised and approved as being of special architectural or historical interest)?  | <del>Yes</del> / No            |
| 6. | Alterations/additions/extensions   |                                |
| a. | (i) During your time in the property, have you carried out any structural alterations, additions or extensions (for example, provision of an extra bath/shower room, toilet, or bedroom)?  If you have answered yes, please describe below the changes which you have made:  | <del>Yes</del> / No            |
|    | (ii) Did you obtain planning permission, building warrant, completion certificate and other consents for this work?  If you have answered yes, the relevant documents will be needed by the purchaser and you should give them to your solicitor as soon as possible for checking.  If you do not have the documents yourself, please note below who has these | <del>Yes</del> / <del>Ne</del> |
|    | documents and your solicitor or estate agent will arrange to obtain them:  |                                |
| b. | Have you had replacement windows, doors, patio doors or double glazing installed in your property?   | Yes / <del>No</del>            |
|    | If you have answered yes, please answer the three questions below:   |                                |
|    | (i) Were the replacements the same shape and type as the ones you replaced?  | Yes / Ne                       |
|    | (ii) Did this work involve any changes to the window or door openings?   | <del>Yes</del> / No            |
|    | (iii) Please describe the changes made to the windows, doors or patio doors (windows when the work was completed):   | vith approximate               |
|    | Double glazing windows fitted December 2013  |                                |
|    | Please give any guarantees which you received for this work to your solicitor or e   | estate agent.                  |
|    |  |                                |
|    |  |                                |
|    |  |                                |
|    |  |                                |
|    |  |                                |
|    |  |                                |
|    |  |                                |

| 7. | Central heating  |  |
|----|--|--|
| a. | Is there a central heating system in your property? (Note: a partial central heating system is one which does not heat all the main rooms of the property - the main living room, the bedroom(s), the hall and the bathroom).  If you have answered yes / partial - what kind of central heating is there? (Examples: gas-fired, solid fuel, electric storage heating, gas warm air).  Gas fired  If you have answered yes, please answer the three questions below: | Yes / No /<br>Partial                          |
| b. | When was your central heating system or partial central heating system installed?  | When flat<br>upgraded prior<br>to my ownership |
| c. | Do you have a maintenance contract for the central heating system?  If you have answered yes, please give details of the company with which you have a maintenance contract:  Scottish Gas   | Yes / <del>No</del>                            |
| d. | When was your maintenance agreement last renewed? (Please provide the month and year).   | February 2021                                  |
| 8. | Energy Performance Certificate   |  |
|    | Does your property have an Energy Performance Certificate which is less than 10 years old?   | Yes / No                                       |
| 9. | Issues that may have affected your property  |  |
| a. | Has there been any storm, flood, fire or other structural damage to your property while you have owned it?   | <del>Yes</del> / No                            |
|    | If you have answered yes, is the damage the subject of any outstanding insurance claim?  | <del>Yes</del> / Ne                            |
| b. | Are you aware of the existence of asbestos in your property?  If you have answered yes, please give details:   | <del>Yes</del> / No                            |
|    |  |  |

|     |   |  |                     |                            |                          |  |
|     |   |  |                     |                            |                          |  |

| 11. | Responsibilities for Shared or Common Areas   |  |
|-----|---|--|
| a.  | Are you aware of any responsibility to contribute to the cost of anything used jointly, such as the repair of a shared drive, private road, boundary, or garden area?   | Yes / <del>No</del> /<br><del>Don't Know</del>     |
|     | If you have answered yes, please give details:  |  |
|     | General up keep of shared garden  |  |
| b.  | Is there a responsibility to contribute to repair and maintenance of the roof, common stairwell or other common areas?  | Yes / <del>No</del> /<br><del>Not applicable</del> |
|     | If you have answered yes, please give details:  |  |
|     | General repairs to roof, stairwell and security door  |  |
| C.  | Has there been any major repair or replacement of any part of the roof during the time you have owned the property?   | <del>Yes</del> / No                                |
| d.  | Do you have the right to walk over any of your neighbours' property - for example to put out your rubbish bin or to maintain your boundaries?   | <del>Yos</del> / No                                |
|     | If you have answered yes, please give details:  |  |
| e.  | As far as you are aware, do any of your neighbours have the right to walk over your property, for example to put out their rubbish bin or to maintain their boundaries?   | <del>Yes</del> / No                                |
|     | If you have answered yes, please give details:  |  |
| f.  | As far as you are aware, is there a public right of way across any part of your property? (public right of way is a way over which the public has a right to pass, whether or not the land is privately-owned.) | <del>Yos</del> / No                                |
|     | If you have answered yes, please give details:  |  |
| 12. | Charges associated with your property   |  |
| a.  | Is there a factor or property manager for your property?  | <del>Yes</del> / No                                |
|     | If you have answered yes, please provide the name and address, and give details of any deposit held and approximate charges:  |  |
|     |   |  |
|     |   |  |
|     |   |  |
|     |   |  |
|     |   |  |
|     |   |  |
|     |   |  |
|     |   |  |

| b.  | Is there a common buildings insurance policy?  | <del>Yos</del> / No /    |
|-----|--|--------------------------|
|     | If you have answered yes, is the cost of the insurance included in your monthly/annual factor's charges?   | Yes / No /<br>Den't Knew |
| C.  | Please give details of any other charges you have to pay on a regular basis for the upkeep of common areas or repair works, for example to a residents' association, or maintenance or stair fund.   |                          |
| 13. | Specialist works   |                          |
| a.  | As far as you are aware, has treatment of dry rot, wet rot, damp or any other specialist work ever been carried out to your property?  | <del>Yes</del> / No      |
|     | If you have answered yes, please say what the repairs were for, whether you carried out the repairs (and when) or if they were done before you bought the property:  |                          |
| b.  | As far as you are aware, has any preventative work for dry rot, wet rot, or damp ever been carried out to your property?   | <del>Yos</del> / No      |
|     | If you have answered yes, please give details:   |                          |
| C.  | If you have answered yes to 13(a) or (b), do you have any guarantees relating to this work?  | Yes / No                 |
|     | If you have answered yes, these guarantees will be needed by the purchaser and should be given to your solicitor as soon as possible for checking. If you do not have them yourself please write below who has these documents and your solicitor or estate agent will arrange for them to be obtained. You will also need to provide a description of the work carried out. This may be shown in the original estimate. |                          |
|     | Guarantees are held by:  |                          |
|     |  |                          |
|     |  |                          |
|     |  |                          |
|     |  |                          |
|     |  |                          |
|     |  |                          |
|     |  |                          |
|     |  |                          |
|     |  |                          |
|     |  |                          |
|     |  |                          |

| 14.   | Guarantees   |                      |            |               |                        |                                   |                            |
|-------|--|----------------------|------------|---------------|------------------------|-----------------------------------|----------------------------|
